# The academicons package High quality icons of online academic profiles

Diogo A. B. Fernandes\* (LATEX code) James Walsh (font and icons design)

v1.8.6, released on 16 April 2018

#### Abstract

The academicons package provides specific ( $\!$ LA)T<sub>E</sub>X bindings with the free  $\!$  Academicons font, allowing access to 76 high quality icons of online academic profiles.

### 1 Description

The academicons package provides access in (LA)TEX to 76 high quality icons of online academic profiles included in the free Academicons font. This package requires the fontspec package and either the XH(LA)TEX or Lua(LA)TEX engine to load the Academicons font from the system, which requires installing the bundled academicons.ttf font file. As new releases come out, it is recommended to install the bundled font version as there may be differences between the package and previous font versions or newest font versions not yet contemplated in the package.

The *Academicons* font was designed by James Walsh and released<sup>1</sup> under the open SIL Open Font License<sup>2</sup>. This package is a redistribution of the free *Academicons* font with specific bindings for (A)TEX. It is inspired and based on the fontawesome<sup>3</sup> package.

# 2 Usage

\aiicon

The academicons package provides the generic \aiicon command to access icons, which takes as mandatory argument the \( \lambda name \rangle \) of the desired icon. It also provides individual direct commands for each specific icon. The full list of icons and their respective names and direct commands can be found below. For example, \aiicon{googlescholar} yields the same result as \aiGoogleScholar.
